

Azienda leader nella creazione **di cilindri di laminazione, calandre, camicie e mole**, serve industrie nel settore della siderurgia, della plastica e gomma, dei laterizi ed alimentare.

**We manufacture:**

- Cast iron rolls** for flat products and profiles in the **iron and steel industry**
- Cast iron rolls** for the **rubber and plastics industry**
- Roller shells and rings** for the **brick and tile industry**
- Special Constructions**

**Our strong points:**

- High precision** of shape, surface, **deep drilling** and true running
- Hot grinding** at temperatures of **more than 200°C**
- High precision** surface profiles through **CNC-controlled grinding**

We are now in a position to offer you the well-known, proverbial "BUCH precision" also for **regrinding** your rolls.

After previous agreement we are able to handle your order within a short period of time, with the following possibilities:

- **Cold and hot grinding** with any surface finish, **superfinish, polish-ground or dull-ground**
- **High-precision crown grinding, CNC-controlled**
- Grinding of new rolls and **regrinding** of rolls, also including **hard chrome plating**
- Optimal **true running** and **perfect shape**
